

Franchise Opportunity Overview

The Dental Support Plus Franchise is a unique, results-proven proprietary system that provides a customer Service Department for Dental offices.

Dental Office Customer Service Department

We supply Partner Dentists with new patients. We qualify the patients, review the dental plan with the patients, schedule the patients, confirm the appointments with the patients and follow-up with the patients. In addition, we reschedule patients where necessary and garner referrals from the patients.

This is the first time that the dental community has ever had a true customer service department for patients of dental offices. Until now, dental offices simply waited for new patients to walk in or call in. Appointments were scheduled at the front desk and confirmed by telephone: That's all.

The Dental Support Plus Customer Service Department costs the Partner Dentists nothing. The Franchisor supplies the Partner Dentists with the fundamental practice management training and services no cost.

Franchisee Responsibilities

The Franchisee is involved only in the Customer Service Department responsibilities. These responsibilities may be completed directly by the Franchisee or subcontracted to Franchisor approved marketing companies that provide such services. Franchisee needs no dental background or training.

*This is a franchise with which you may determine the amount of time and effort you will expend. You may assume all of the work effort or you may subcontract almost all of it. You may “**Work Smarter, Not Harder, or Almost Not At All.**” You may assume the Customer Service Department responsibilities and delegate the work efforts to others.*

Cash Flow/Income

\$100,000 or more annual income may be accomplished by a Franchisee utilizing our Multiple Franchise Units system. Each Franchise Unit costs \$20,000 and is designed to create \$10,841 of annual income.* Each Franchise Unit purchased qualifies the Franchisee to purchase two additional Franchise Units within 48-months. These options may be financed and/or purchased with earnings. As a result, a 5-Franchise Units purchase may develop \$100,000 to \$150,000 or more of annual income within 2-4 years.

The Dental Support Plus Platform is modeled after, and licensed from, an organization that has proven the system for the last 51/2 years. As a matter of fact, their results have been approximately 5-times greater that what was needed to design the Dental Support Plus Platform and develop the numbers we are using.
